### LANGUAGES

Russian: Native

English: Intermediate (B1)

### ABOUT ME

Frontend developer with 3 years of experience specializing in creating web applications using React and Next.js. Strengths include building responsive interfaces and server-side rendering solutions.

### WORK EXPERIENCE

#### Frontend Developer with Server Integration Experience

- Chef Kitchen 2022-2024  
<https://chef-kitchen.com/>
- Developed functional and responsive client-side components using PHP, Laravel, Livewire, and JavaScript.
  - Implemented complex user interfaces with a focus on cross-browser compatibility and adaptability.
  - Added support for 3 languages, which, according to analytics, increased site traffic by 24%.

### PERSONAL PROJECTS

#### Test Creation and Passing Web Application

- JavaScript, Next.js, MongoDB, Tailwind CSS 2023  
[glotz.vercel.app](https://glotz.vercel.app)
- Developed functionality for creating user-generated tests and passing tests created by others.
  - Implemented user registration and authorization for managing tests and saving results.
  - Added a test rating feature, allowing users to leave feedback.

#### E-Commerce Interface Project

- TypeScript, Next.js, MongoDB, Tailwind CSS 2023  
[grivont.vercel.app](https://grivont.vercel.app)
- Built an e-commerce platform using TypeScript and Next.js, implementing extensive user functionality.
  - Added user registration and authentication to enable secure application access.
  - Implemented product search by name, category, and filters (e.g., color, price).
  - Created features for adding products to favorites or cart and simulated the checkout process with order history tracking.
  - Developed a personal profile page for users to add their products and publish posts.

#### Social Network Web Application

- JavaScript, Next.js, MongoDB, Tailwind CSS 2023  
[flumpf.vercel.app](https://flumpf.vercel.app)
- Built functional and responsive user interface components using Next.js.
  - Integrated a MongoDB database for efficient data storage and processing.
  - Implemented authorization with features such as account creation, posting content, likes, and comments..
