ABOUT ME

I am a Frontend Developer with 3 years of professional experience. I started my career as a web layout designer, building websites using HTML, CSS, and JavaScript. Over time, I advanced my skills and specialized in creating modern, functional websites using React. I have also developed projects with Next.js, which gave me valuable experience in server-side rendering and working with backend features. My focus is on delivering clean, responsive, and user-friendly interfaces while ensuring high performance and code quality.

WORK EXPERIENCE

Frontend Developer with Backend Integration

Chef Kitchen 2023-2024
<https://chef-kitchen.com/>

- Developed functional and responsive client-side components using Laravel and Livewire.
- Ensured seamless user interaction (UI/UX) and integration with the backend.
- Implemented complex user interfaces focusing on cross-browser compatibility and responsiveness.
- Configured interface localization to support multiple languages.

Freelance Web Layout Designer

Self-Employed 2021-2022

- Created custom websites using HTML, CSS, SCSS, and JavaScript.
- Utilized Gulp for task automation and workflow optimization.
- Developed responsive and optimized websites with a focus on fast loading times.
- Ensured cross-browser compatibility and high-quality user experiences.

PERSONAL PROJECTS

Social Media App

<https://chef-kitchen.com/> 2023

- Developed functional and adaptive user interface components using Next.js.
- Integrated MongoDB for efficient data management and storage.
- Implemented authentication, allowing users to create accounts, write posts, like posts, and leave comments.
